DIGITAL UNDERWATER PHOTOGRAPHER

February 9th, 11th, 16th

Digital has taken the underwater photography world by storm. Get in on the action with the PADI Digital Underwater Photographer Specialty course. You can quickly and easily capture the underwater world with your camera and on your computer.

During the PADI Digital Underwater Photographer Specialty course, you learn to use the PADI SEA (Shoot, Examine and Adjust) method, which takes full advantage of digital technology. The result is superior underwater photos faster than you may imagine. You not only learn how to take great photos, you'll learn how to share them via email or printing, optimize your work with your computer, learn about storage and more.

- Must be a PADI Open Water Diver or Junior Open Water (or have a qualifying certification from another training organization). However, you can take the course as a snorkeler and receive a non-diving certification. Better yet, take the Open Water Diving course too!
- Choosing and using modern digital cameras and underwater housings
- Using the PADI SEA method for getting great shots quickly
- Editing and sharing your pictures
- The three primary principles for getting superior photos underwater
- The PADI Digital Underwater Photographer certifications credits toward the Master Scuba Diver rating.
- This is one of PADI's most adaptable specialty courses, and can even be started during the last dive of your PADI Open Water Diver course

The Staff at the Float N' Flag love photography and videography. Please visit us at the store and check out the prints. We'll even showcase your trip photos on one of our in-store screens for others to see as well.

Prerequisites: Open Water or Junior Open Water Certification

Cost: \$200 + Materials

Schedule:

1st Session @ 6:00pm : Classroom at Float N' Flag Dive Centre

2nd Session @ 6:30am : Pool work

3rd Session @ 6:00pm : Classroom at Float N' Flag Dive Centre
