# EMERGENCY OXYGEN PROVIDER

March 19<sup>th</sup>

Be the one ready to help a fellow diver should the need arise by becoming a PADI Emergency Oxygen Provider.

**The Fun Part:** Breathe easy—knowing that you know how to recognize illnesses treatable by emergency oxygen. Being the best buddy you can be means being prepared – especially in a time of need.

### **What You Learn:**

You learn how to

- \* Recognize diving illnesses treatable by emergency oxygen
- \* Properly setup equipment
- \* Administer emergency oxygen

### **The Scuba Gear You Use:**

Scuba gear is not necessary to take this course. The Float N' Flag Instructor will provide all the necessary equipment and supplies for the course.

### **The Learning Materials You Need:**

The PADI Emergency Oxygen Provider Manual is an important component of PADI's Emergency Oxygen training program. Before the class, you'll review a step-by-step explanation of when and how to provide emergency oxygen. You'll also learn about safety considerations, and how to assemble and disassemble emergency oxygen equipment. The care-at-a-glance card is a quick reference guide to pack in your gear bag and review in case of an emergency.

### **Prerequisites:**

Though suited for divers, this course has no prerequisites and doesn't include dives, which means it is equally applicable to those who are around divers – boat crew, non-diving buddies, lifeguards, and shore staff. You don't need any previous CPR or first aid training to take the course.

**Cost:** \$150 (Includes Manual @ \$40 and Course + Certification fees @ \$110)

### **Schedule:**

March 19<sup>th</sup> @ 6:00pm at Float N' Flag Dive Centre
