PADI ENRICHED AIR (NITROX) DIVER

Welcome to one of PADI's most popular specialties – the PADI Enriched Air Diver course. Diving with enriched air nitrox lets you safely extend your no stop time beyond the no decompression limits for air. Diving with enriched air means more time underwater – but you need to be certified as an Enriched Air Diver to get enriched air fills.

Whether you're into underwater photography or wreck diving, on vacation in some tropical paradise or just out for a leisurely day of diving at your local dive site, the PADI Enriched Air Diver course helps you get more out of diving by giving you more time underwater. Prerequisite: Must be a PADI Open Water Diver (or qualifying certification from another organization).

What you'll learn:

- Learn to analyze cylinder contents.
- Plan enriched air dives.
- Safely increase your no stop time.
- Certification counts toward the Master Scuba Diver rating.

Cost: \$225 (Includes Enriched Air Crew Pack, Instruction and Certification Fees)

Schedule:

This course involves just 1 classroom session. There are no training dives required for certification.

Classroom 6:00pm - 10:00pm @ Float N'Flag

NOTE - The PADI minimum age requirement is now only 12 years of age, but please be advised that there are some math and other skills required to complete the course.
